EDUCATION

• University Of Kansas

Lawrence, KS

Bachelor of Science in Computer Science | GPA: 3.43/4.00

May 2026

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks

PROFESSIONAL EXPERIENCE

Veterans United Home Loans

Columbia, MO

Full-Stack SWE Intern

May 2026 – Present

- Diagnosed and resolved a customer-reported production bug on the insurance pipeline spanning a **.NET 8** / **ASP.NET Core** API and an **Angular** front-end, isolating two co-dependent defects (a response-deserialization bug in a C# CRM client and a query-parameter mismatch in an Angular service) after disproving the initial root-cause hypothesis
- Drove fixes end-to-end from triage to product-owner hand-off, authoring regression tests with **MSTest** and **Moq** on the backend and applying test-driven development with **Jasmine/Karma** on the front-end
- Validated changes in a live UAT environment via remote debugging, attaching a **Visual Studio** debugger over SSH to an **Okteto** session on a **Kubernetes** pod, and shipped feature builds through a Mia-Platform / **Docker** pipeline
- Investigated production-shaped data across **MongoDB** and **Microsoft Dynamics 365 CRM** (OData, FetchXML) to source valid QA subjects, and verified API behavior end-to-end with **Postman**
- Shipped a multi-brand compliance change in the Angular app, gating brand-specific content behind a brand check while preserving a functional consent opt-out control in coordination with compliance SMEs

City of Kansas City, MO

Kansas City, MO

Full-Stack SWE Intern

May 2025 – May 2026

- Led migration of city-wide applications to Windows Server 2022, enhancing infrastructure security and performance across platforms serving 1.3M+ annual users
- Redesigned the public Food Handler website with modern **ASP.NET**, **C#**, and **JavaScript**, improving accessibility and user flow for residents
- Built admin interface for managing confirmation and cancellation emails, including bulk reset functionality and database integration using **SQL Server**

CodePath

Remote

Tech Fellow: Web 102

May 2025 – Present

- Mentor a cohort of 30 students while supporting a full 300-student nationwide class, providing personalized guidance on full-stack web development concepts
- Facilitate weekly breakout rooms to drive engagement, answer technical questions, and promote inclusive learning environments
- Deliver 1-on-1 and group support on **React**, **Supabase**, authentication, REST APIs, and backend integration

PROJECTS

CarGoo – Cloud-Based Vehicle Diagnostics | *Next.js, GraphQL, TypeScript, Tailwind, Shadcn*

- Led front-end development using **Next.js** and **Shadcn** to design a responsive UI for real-time OBD-II diagnostics and AI-generated DTC reports
- Integrated **GraphQL** queries and mutations to connect the frontend with a Rust-based backend, enabling live vehicle data updates and dynamic admin control
- Engineered dashboards and visualizations to make complex automotive data accessible to users of all technical levels

SKILLS

Programming: TypeScript, JavaScript, Python, C#, C++, SQL, HTML, CSS

Frameworks & Tools: .NET 8 / ASP.NET Core, Angular, React, Next.js, Node.js, LINQ, Git, Docker, Kubernetes, Postman, Jira

Testing & Data: MSTest, Moq, Jasmine/Karma, SQL Server, MongoDB, Dynamics 365 CRM (OData, FetchXML)

AI Tools: Claude Code, Codex, Cursor, ChatGPT, Gemini, Copilot
